The Smart Stair Solution for Residential Sheds

EcoStair is our light-duty, bolt-together steel staircase kit designed **specifically for internal use** in residential sheds and studios, including those on lifestyle blocks. It's ideal for projects where crane access is limited or site conditions are tight, allowing for easy in-situ assembly by just two people.

Built from DuraGal steel, **EcoStair** offers a cost-effective yet reliable solution without compromising on strength or style. Every kit includes all required parts and fixings, along with a detailed step-by-step instruction booklet and a list of necessary tools. Thanks to our precision-cut bolt-together design, no on-site welding is required—making **EcoStair** very DIY friendly.

Each **EcoStair** kit is manufactured to the exact finished floor height of the customer's mezzanine.
