# EASY**Stair**

R A N G E

**Built for Access.  
Designed for Toughness.**

**EasyStair** is a heavy-duty, bolt-together steel staircase kit for demanding sites. Supplied flat-packed, **it's ideal for factories, workshops, farm sheds, machinery bays, and access to site offices or containers** – anywhere you need safe, permanent access but crane lifts are limited. Each kit can be carried in by hand and assembled in place by two people, with no heavy lifting equipment required.

Manufactured in Australia, **EasyStair** is built to handle hard daily use, harsh weather, and dirty site conditions. It's a strong, durable, and cost-effective alternative to fully welded stairs, suited to industrial, commercial, and agricultural projects where reliability comes first.

Every kit includes all parts, fixings, and a step-by-step instruction booklet with a list of required tools. Our CNC plasma-cut, bolt-together design means every hole lines up precisely – **no measuring, drilling, or on-site welding**. The result is a faster, safer install, whether done by your own team or your preferred contractor.

## Mezzanine Fixing Options
